DETAILED ACTION

Remarks

1. The rejection in the Office Action mail on November 29, 2005 is withdrawn. Other rejection is made to strengthen the examiner's position with respect to Double Patenting rejection of the system for monitoring lithography lasers.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-28 the instant application are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,687,562 B2. Although the conflicting claims are not ***Double Patenting*** identical, they are not patentably distinct from each other because: Regarding claims 1-14 of the U.S. Patent 6,710,541

recites a system for monitoring lithography lasers (see column 13, lines 38-56, col. 14, lines 1-54) comprising all of elements of claims 1-28 the instant application. Therefore, claims 1-14 meet all of the limitation of claims 1-28.

Allowable Subject Matter

4. Claims 29-51 are allowed

None of the prior art teaches the method for monitoring lithography lasers at at least one integrated circuit fabrication plant comprising steps of using the plurality of lasers, providing the terminal server, utilizing the central fabrication plant server unit in communication through the local area network, and utilizing the second server unit to provide communication through the communication network.
